TECH STACKS

- LLM/GenAI/Prompt Engineering/Prompt Tuning/Langfuse
- OpenCV/CNN/YOLO
- Data Analysis/ Visualization
- ML sckit-learn (classification/ regression models)
- Python/Django/FastAPI/ Playwright/ Celery
- React.js/Tailwindcss
- Java/Flutter/C++

TOOLS

- Postgresql/MongoDB/ SQL/Redis/Snowflake
- PowerBI
- Airbyte/Mage
- Docker/AWS/Digital Ocean
- Git/GitHub

EXPERIENCE

Data Scientist Internship at Hiredly  
(September 2025 - February 2026)

- Web scraping automation (Playwright)
- Text Mining and OCR-based extraction
- Prompt Engineering and Embedding (OpenAI)
- Internal Recommendation System using FastAPI endpoint for automation concurrency process pipeline and hybrid search
- SQL and Mongo Query Database Usage (Postgresql, MongoDB)
- LLM evaluation and Prompt-tuning (Langfuse, Uptrain, DeepEval, DSPy)
- Data Analysis and Visualization Automation Pipeline (Weekly Report)
- Cloud Deployment using docker containerization (AWS ECR, AWS SQS, AWS Lambda, AWS S3, Digital Ocean)
- ATS Matching Score Additional Backend Features
- Data Engineering/Ingestion (Airbyte, Mage, Snowflake)
- Research on LLM Model using vLLM, Ollama in Google Colab

Data Analyst Internship at APU  
(August 2024 - October 2024)

- Research Project in Text Mining and Document Extraction
- Web-based application using Flask Framework, HTML, CSS, and JavaScript

PROJECTS

Data Analyst Assignment

- Case Study on the severity of lung cancer
- Data Analysis and Machine Learning Algorithms, such as Random Forest, Linear Regression, and Logistic Regression using Python
- Case Study on the website defacement attack
- Data Analysis and Data Visualization using R programming language

Diploma FYP Assignment

- Case Study on Weather Forecasting System
- Data Collection and Machine Learning Algorithms, such as Random Forest and SARIMA using Python
- Design User Interface using Figma

Haemodialysis Alert System

- Web alert system built with React, SQL, Django
- Analytics dashboard for health information and KPI improvement
- Interpersonal Skills, Collaboration, and Problem Solving

Freelancer Finance Application

- Alibaba Hackathon
- Full-stack development using React, SQL, and Django
- OCR extraction
- Prompt Engineering

APQueue Application Assignment

- Flutter Application integrated with Firebase Firestore backend using MVC architecture
- Designed a real-time queue management system to reduce crowd in APU campus.

## SOFT SKILLS

- Problem-Solving
- Research Skills
- Critical Thinking
- Analytical Thinking
- Continuous Learning
- Adaptive Learning
- Creativity
- Attention to details
- Collaboration & Communication
- Agile practices

## LANGUAGES

- English
- Chinese
- Malay

### Facial Recognition Research Assignment

- Developed a facial recognition classification model using transfer learning with pre-trained VGG16 architecture (Tensorflow framework).
- Performed data preprocessing, augmentation, and feature extraction (MTCNN) to improve model generalization.
- Fine-tuned the final layers of VGG16 to adapt the model to a custom facial dataset for classification tasks to achieve a 92% of overall accuracy among 5 classes.

### Pickleball Evaluation Application

- Web evaluation system built with React, Postgresql, Django
- Skill Posture Evaluation and Recommendation
- Data Collection, Feature Engineering, Computer Vision, Prompt Engineering

### Internal Recommendation System (Internship)

- Developed automated scraping resume using Playwright.
- Developed high-performance FastAPI services with Celery-based distributed task queues to handle concurrent resume processing.
- Designed and Implemented LLM prompt engineering and embedding pipelines for structured data extraction and semantic indexing with the integration of LLM observation, Langfuse.
- Designed a hybrid retrieval architecture (vector + keyword search) to enhance relevance scoring.
- Integrated HEX interface to retrieve data insights for non-technical stakeholders.
- Managed scalable infrastructure using AWS S3 bucket, MongoDB, Redis, Docker, and DigitalOcean deployment environments.

### LLM Evaluation System (Internship)

- Engineered an automated LLM observability pipeline integrating Langfuse trace retrieval.
- Designed and customized criterias evaluation frameworks using DeepEval and Uptrain to measure response quality, relevance, and hallucination.
- Architected scalable evaluation workflows using AWS SQS and AWS Lambda to process 3k-4k weekly traces data concurrently.
- Developed automated metrics pipelines for continuous LLM monitoring.
- Implemented anomaly detection on metrics and check source using SQL query to identify issue.
- Performed prompt optimization using DSPy to recover performance when evaluation metrics drops.
- Monitor the performance of recommendation system.

## EDUCATION

### BACHELOR DEGREE OF COMPUTER SCIENCE IN ARTIFICIAL INTELLIGENCE (AI) (Year 2)

ASIA PACIFIC UNIVERSITY  
2024-2025

CGPA 3.61

### DIPLOMA IN ICT WITH A SPECIALISM IN DATA INFORMATICS (DI)

ASIA PACIFIC UNIVERSITY  
2022-2024

CGPA 3.84

### Secondary Education

SMJK (C) YUK CHOY  
2017-2022

SPM 7A 3B+
